COUNTER-SINKS - EDGE TREATMENTS

Three new edge treatments are available for Counter-Sinks.

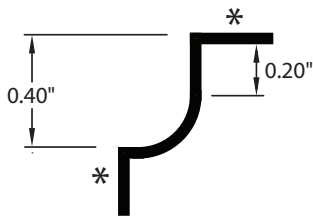

These treatments provide a very tasteful detail, enabling the Counter-Sink to further integrate with other design appointments in the bathroom.

Please note that if the gloss finish is selected for the Counter-Sink, gloss finish will apply to the sink bowl, the top surface and the vertical face of the Counter-Sink. The detailed area of the edge treatment will remain matte.

Edge treatment option must be specified on worksheet available at mtibaths.com.

Cove Edge

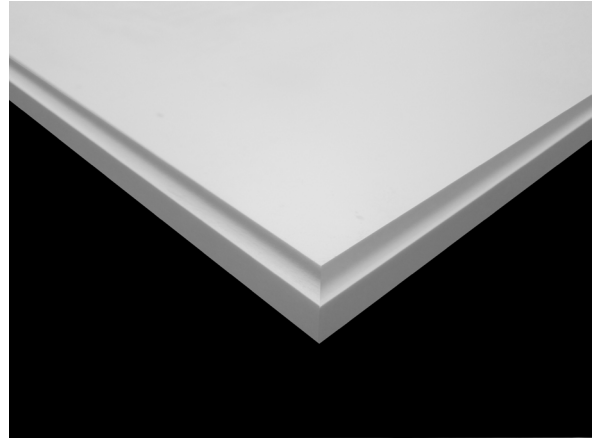

PART # CET1

*When ordered with a gloss finish, these will be the only gloss surfaces.

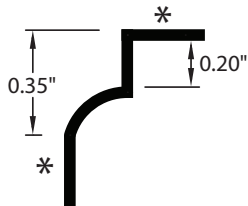

•Routed surfaces will remain in a matte finish.

•1" minimum counter thickness is required for edge treatments.
