GLASS PARTITION WALLS

Bendheim has collaborated with Robert A.M. Stern Architects and OmniD&ecaron of Italy to create a timeless collection of glasses for the international design/build market. The new Robert A.M Stern Collection for Bendheim is designed for installation in partition walls, doors and windows, shower enclosures, building façades, and decorative features. The collection

is produced on ultra-clear low-iron float glass, utilizing sophisticated production methods with particular attention to the strictest environmental protection standards and can contribute LEED points. The glass is available in three standard thicknesses: 1/4 inch (6 mm), 3/8 inch (10 mm) and 1/2 inch (12 mm) and in sheets up to 88.5 by 126 inches (225 by 320 cm).

COMPACT FLUORESCENT

Nora Lighting introduces the industry's first compact fluorescent GU24 family of housings and trims that accept interchangeable, self-ballasted GU24 CFL lamps in 13W, 18W and 26W. The NHIC/NHRIC GU24 CFL Series includes six down light models with 4-, 5- and 6-inch apertures, all designed for new construction and remodeling. The self-ballasted CFL lamps feature electronic instant-starts and no-flicker performance. All new Nora CFL housings are CA Title 24-compliant, and the 6-inch version is Energy Star-rated. Fixtures are airtight and approved for insulated ceilings and cUL-listed for damp locations.

DUCT SOLUTION

Overcome problems caused by long duct runs on clothes dryers in multifamily applications with Fantech Dryer Booster Fans. The automatic pressure sensing technology activates the fan when the dryer is on so warm, moist air from the dryer is quickly exhausted out of the building, making it ideal for multifamily applications where stack effect prevents proper dryer operation. Choose from several models, including the DBF4XLT with wall-mount indicator panel, which lights up to assure the homeowner that unit is operating properly.

STYLISH SINK OPTIONS

MTI Whirlpools introduces the new Petra Double Sink. This trough-style luxury sink combines minimalist design with the beauty of solid-surface construction. Because the surface is nonporous, it is naturally resistant to stains. Approximately 60 percent of the material is organic, including minerals mined from the earth and dirt. The result is molded stone. This collection presents a rich resource for those looking for bath products in alternative, natural materials. The Petra Double LV Sink measures 47 1/2 by 14 by 5 1/8 inches and retails for \$1,249. It features one-piece construction and is available in white and biscuit in either matte or gloss finish. Petra can be ordered to install vessel-style on top of a vanity or as a semi-recessed version.
