GLASS TILE

The Modono Glass Tile Collection comes in several standard sizes, ranging from as small as 3-by-3-inch to as large as 12-by-28-inch. The collection is offered in four distinct series: Opulence, Vintage, Extreme and Organic. Each series has its own unique patterns, textures and coatings to create different

aesthetics for just about any application and taste. The series are designed and developed by nationally recognized designer Carrie Fazio, whose flare for dramatic designs can be seen in multiple projects nationwide.

DOOR SYSTEM

BEA's Enhanced Door Position System (EDPS) can be installed on any new or retrofit swing door system, and works on AC, DC, PWM, pneumatic and hydraulic operators. The EDPS' sensor uses micro-electro mechanical systems gyroscope to accurately determine the door's position. This solves the issues commonly caused by stack pressure, manual push operation or foreign objects preventing the door from closing. All of BEA's activation and safety sensors plug directly into the EDPS hub using quick disconnects. The hub uses a basic two button and display routine for easy programming and usage.

STREETLIGHTS

Sun Valley Lighting's turn-of-the-century streetlights now feature new VLED Optical Modules for precise, energy-efficient LED performance. The VLED Modules, featuring Philips/Lumileds Luxeon Rebel emitters, deliver full-spectrum illumination while minimizing light pollution, trespass and glare. Sun Valley Lighting offers a varied and versatile collection of traditional-styled luminaires with VLED modules, including the popular lantern-style Sigma fixture.

WINDOW WELL SYSTEM

Bilco's stakWEL's Modular Window Well System is constructed of corrosion-resistant high-density polyethylene. About the same size and shape as many traditional metal window wells, stakWEL is impervious to soil and moisture conditions and will not rust, rot or discolor, offering homeowners a virtually maintenance-free window well. Additionally, it is a cost-effective replacement option with a price that is competitive to steel and less than that of pre-cast concrete window wells currently on the market. StakWEL can be used with full-size poured-in-place egress and utility windows.

CABINET STAINS AND PAINTS

Canyon Creek Cabinet Company's new paint and stain colors increase its standard offering to 36 color choices. The new paints include Ochre, a deep, earthy mustard yellow; Icing, a soft white with a hint of yellow; Mist, a pale, cool gray; and Cardinal, a deep, dark red with a touch of blue; and Caraway, a warm and rich brown stain. Also added are two Artisan distressing packages that give cabinetry a vintage look and simulates the natural appearance of aged wood.

BATH WHIRLPOOL

MTI Whirlpools' MTI BASICS Walk-In Tub is a more specialized product that falls within the realm of universal design. With its long list of practical safety features and a plentiful assortment of options, this cleanly designed contemporary tub meets specific demands while enabling stylish integration in the household. The walk-in tub features practical design elements that easily accommodate the bathing needs of those with mobility limitations. The door is light-weight and easy to latch. Included in the interior are a comfortable molded seat, textured slip-resistant floor and two well-placed acrylic grab bars.
