Pantheon

Linkasink

Linkasink's Pantheon Sink shows a new level of sophistication for bathroom sinks.

Modeled after the dome ceiling of the Pantheon in Rome, this bronze sink incorporates fine details that produce an extraordinary result. When looking at the sink beside a picture of the Pantheon, the resemblance is remarkable. Even the opening at the top of the dome is mimicked with the drain hole for the sink. Each sink is hand-made using the old world technique of pouring molten bronze into hand-carved wooden molds. The Pantheon Sink is new to the Linkasink line OE and even with its 21st century debut date the sink has a wonderfully ancient feel to it. **Booth 406**

Starck K

Duravit

Starck K is a collection of kitchen sinks that addresses simple yet diverse kitchen activities such

as washing dishes, cleaning vegetables and draining pasta by fusing a clean, modern aesthetic with comfort and practicality. The form of the Starck K kitchen sink focuses on the bare essentials. A series of right angles represents the primary design principle of reduction where

clean lines form a sleek rectangle. In addition to a generous and comfortable basin size, Starck K features an extensive draining surface, which is pure and grooveless. Additionally, various sizes and combinations (drop-in, flush-mounted, bowl on left or right, a version with no draining surface) and finishes (white, pergamon, anthracite, chestnut) allow for an easy adaptation into any kitchen environment. The sink is crafted of a specially developed high-mass ceramic that features a high level of impact resistance and is light-fast.

Intarcia Tub

MTI Whirlpools

Radiating timeless beauty, the solid-surface tub is available in white, biscuit, raven and osprey, and can be specified with or without either of two pedestal bases. What's more, Intarcia can be prepared ready to accept an inlay of choice

metal, glass, wood, stone or any other material your imagination desires in the tub, base or both, allowing bathers to personalize their bath environment as never before. This customization is a design triumph that will certainly add a sparkle to the bath. Intarcia can also be equipped with an air bath system. This new Intarcia tub is constructed using MTI Whirlpool's exclusive ESS composite material, a mixture of finely ground natural minerals and binding agents that are liquefied, poured and then hardened. These engineered solid-surface products are non-porous, stain-resistant and mold- and mildew-resistant.

Supernova

Dornbracht Americas

Dornbracht's new Supernova is designed by Sieger Designs. The line is differentiated by unique geometric shapes and gleaming surfaces designed to reflect and refract light. Supernova is offered in polished chrome and platinum and a special pale gold champagne finish that is exclusive to the line. **Booth 203**

Affluence Seamless Sink

Affluence Seamless Sink

Affluence Seamless Sink has eliminated the need for flanges and disposal mounts. The result is a sanitary sink bottom without the need for plumber's putty, silicone or seams, just pure, smooth stainless steel. No more seams that collect water, breed germs and cause rust. A removable (dishwasher safe) splash guard adds to the sanitary effect.

Booth 321

Eryx Sink

MTI Whirlpools

The sloping angles of the Eryx's design are asymmetrical and seem to defy gravity, creating a fixture of interest and awe. The

pedestal sink has an energy that drives from the floor upward and away from the wall. The result is a geometric urban design that is modern yet elegant. Eryx is constructed using MTI Whirlpools' exclusive engineered solid-surface (ESS) composite material, a mixture of ground natural minerals and binding agents that are liquefied, poured and then hardened. These ESS products are non-porous, stain-resistant, and mold- and mildew-resistant. A breeze to clean, they will continue to look brand-new with minimal maintenance.

Waterbridge Exposed Floor Mounted Shower Systems

Sonoma Forge

The rustic design evokes an industrial chic for a wide range of applications from an urban loft to country homes as well as exterior applications. There are four standard models to choose from with different accessories, including handshowers, footwash and eight-inch rainhead.

Antigua Lavatories in Natural Stone, Copper and Vitreous China

D'Vontz

This lavatory basin is manufactured from three types of materials, natural stone, copper, and vitreous china. This lavatory in any material can be installed above counter, half height, drop-in or undermounted.
