AIA hits San Francisco

Wasauna's Newport tub features a touch panel that controls amenities such as a digital FM radio, pulsing jets and prismatic chromatherapy lights. The ozone sterilization system prevents calcium and bacteria buildup. Water capacity is 81 gal. Other features include: 15 jets, seven light settings and a 2-hp pump. For more info circle #62

Victoria & Albert baths are made from Englishcast, a volcanic limestone material that is insulating, scratch- and stain-resistant, and easy to clean. Most of the company's designs are 50 percent lighter than cast iron tubs, an important benefit in older homes with load-bearing restrictions. Englishcast also immediately contains the heat of bath water and holds it, instead of first absorbing it as cast iron does. For more info circle #63

The **Americh Corp.** Contura is designed with a blend of graceful lines and simple beauty. The freestanding tub is a roomy 72 in. long. Also available is the extra-deep Contura II. The tubs may be ordered with the optional air-bath system that infuses the water with thousands of tiny warm air bubbles. For more info circle #65

Jacuzzi Luxury Bath has

reinvented several models as freestanding tubs with fresh minimalist styling. Air tubs feature Pure Air technology, which pushes heated air evenly into the bath, creating warm bubbles and uniform and thorough heat. Gallery 6 (shown) updates a top-selling tub with the signature freestanding look and features a graduated rim style, with optional wood accents.
