POLYETHYLENE BALL VALVES

11 Kerotest Manufacturing Corp., a supplier of valves and related equipment to the worldwide energy markets, introduces a polyethylene ball valve for water and wastewater use. POLYBALL Water Valves protect and preserve safe, healthy, leak-free drinking and water distribution systems. They are approved for use in potable water systems per NSF/ANSI 61 requirements and are manufactured in the USA.

WALK-IN TUB

12 MTI Whirlpools' BASICS Walk-In Tub is specialized for Universal Design, featuring practical design elements that easily accommodate the bathing needs of those with mobility limitations. The door is light weight and easy to latch. Included in the interior are a comfortable molded seat, textured slip-resistant floor and two well placed acrylic grab bars. The tub may be further customized with a deck-mounted hand shower with diverter and high-quality hot/cold filler valves with handles. It can also be ordered as a relaxing soaking tub, a soothing whirlpool with six fully adjustable point-massage jets or a full-body-massage air bath with 20 air jets and heated blower.

NEOPERL KITS

13 NEOPERL introduces four new kits designed to make ordering the right replacement parts easy. The Adapter Kit contains 17 adapters to solve almost any thread issue found in the field. The Washer Kit has an assortment of regular- and junior-size washers, perfect to replace that missing washer on the go. The Shower Solution Kit features two different products in three different flow rates for shower retrofit, and the Water Saving Aerator Kit contains a wide selection of NEOPERL Water Saving products.

ABOVE-DECK SENSOR FAUCETS

14 T&S Brass announces the addition of two Above-Deck Sensor Faucets to the ChekPoint electronic faucet line, EC-3119A and EC-3119B. Both faucets offer complete above-deck electronics for easy installation and maintenance. The EC-3119A features above-deck electronics with a manual mixing valve below-deck, while the EC-3119B features a manual mixing valve above-deck on the right side of the faucet base. They also come standard with long battery life, adjustable temperature control, auto-sensor range adjustment and vandal-resistant aerators.

HYDRO-CORE MANIFOLD

15 Webstone's Hydro-Core Manifold is now available with both 1- and 1-1/4-inch ball valves. These patent pending, fully fabricated forged brass manifolds combine a precision crafted closely spaced tee with Webstone's Isolator with Rotating Flange and Drain. Designed specifically for hydraulic separation, pump isolation and purging the near boiler piping or secondary circuit loops.
