Modern Showers by MTI Baths

LUXURY DEFINED.
INNOVATION ENGINEERED.

MTI shower bases are designed as the foundation of the modern shower—where advanced materials, thoughtful engineering, and refined aesthetics come together. For more than three decades, MTI Baths has handcrafted personalized bath products that prioritize ergonomics, wellness, and enduring design. With over 160 awards for product innovation and design excellence, a nationwide dealer network, and world-class customer support, MTI delivers solutions that perform as beautifully as they look.

As shower walls evolve toward large-format tile, slabs, and seamless materials, the shower floor becomes a critical design element. MTI's one-piece shower bases offer a modern alternative to tiled floors—simplifying installation, improving hygiene, and eliminating the ongoing maintenance of grout lines. Designed to integrate seamlessly across materials and applications, MTI shower bases support clean architecture, accessibility, and long-term performance.

Key Design Advantages

- One-piece construction for simplified installation
- Cleaner, more hygienic alternative to tiled shower floors
- Low-profile and zero-barrier design options
- Material solutions for residential and hospitality environments

COLLECTION

Mineral Composite Shower Bases

STONE-INSPIRED DESIGN. MADE FOR EVERYDAY LIVING.

The Acquabella Collection defines modern shower design through mineral composite craftsmanship. These shower bases are offered in a range of sizes, refined stone textures, and a curated color palette that complements contemporary bath architecture. The low-profile, multiple-threshold design allows for glass enclosures on multiple sides, delivering a clean, open aesthetic while supporting ease of entry and exit. Shallow thresholds also allow bases to be recessed for true zero-barrier installations.

MTI mineral composite is crafted from finely ground minerals, blended with high-grade casting resin and poured into precision molds prepared with a proprietary coating. During curing, the materials chemically bond to create a dense, cast-stone surface that is then hand finished for exceptional quality and consistency.

Material & Performance Highlights

- Natural stone textures with refined color options
- Non-porous, UV-, stain-, mold-, mildew-, and impact-resistant surface
- Factory-installed tile flange for waterproof installation
- Low-profile, multiple-threshold and zero-barrier capabilities

DELGADA

Refined and minimal, the Delgada shower base features a thinner profile and a square matching drain cover for a crisp architectural finish. Available with either a center or end drain, it offers layout versatility within a low-profile, multiple-threshold design. The Pizarra surface texture delivers an organic, aggregate stone appearance with natural variation.

ARTESA

Bold yet understated, the Artesa shower base is anchored by a trough-style end drain cover that creates a strong visual line. A low-profile, multiple-threshold configuration provides a clean foundation for contemporary shower spaces. Finished in the Pizarra texture, the surface showcases rich, stone-inspired character with subtle movement.

LADO

Sleek and contemporary, the Lado shower base is defined by a crescent-shaped end drain cover that adds a subtle design accent. Its low-profile, multiple-threshold form supports clean lines and flexible enclosure placement. The Lastra linear texture, available in five color options, introduces refined depth and modern character.

Acrylic & Solid-Surface Shower Bases

MODERN SURFACES. LUXURIOUS COMFORT.

The MTI Solutions Collection brings modern showers to life through advanced materials designed for refined aesthetics and everyday durability.

DoloMatte® shower bases offer a true solid-surface construction with a velvety-soft matte finish and consistent color throughout. Each base begins as a thick, American-made slab composed of specialty polymers and ground minerals. After thermoforming, the base is reinforced with a structural backing of fiberglass, wood, resin, and titanium for added strength, then hand finished for precision and beauty.

Acrylic CXL® shower bases deliver a sleek, high-performance surface with a clean, contemporary appearance and long-term durability. Both materials are non-porous, UV-, mold-, and mildew-resistant, making them easy to clean and maintain in high-use environments.

Most bases feature low-profile, multiple-threshold designs, can be recessed for zero-barrier installations, and are factory-equipped with tile flanges for dependable waterproofing. Select models can also be enhanced with MTI's Radiance® heated shower base system for added comfort underfoot.

Design & Comfort Features

- * True solid-surface construction with renewable finishes
- * Matte (DoloMatte®) and smooth gloss (Acrylic CXL®) options
- * Durable, scratch- and stain-resistant surfaces
- * Factory-installed tile flanges for secure installation
- * Optional Radiance® heated shower base system

ACCESSORIES FOR SHOWERS

Complete your shower experience with products designed to elevate everyday use. Made from premium materials and easy to maintain, they complement MTI Baths shower bases beautifully in both form and function.

TEAK SHOWER SEAT

Inherently slip-resistant teak brings an organic element to the shower with its natural beauty and ability to ward off fungi, mold and mildew. Stainless steel frame with positive stop friction spring guide bracket holds seat in position. MTI Baths uses only 100% legal, FEQ (First European Quality) sustainable teak lumber.

TEAK BATH MAT AND SHOWER TRAY

Smooth, durable, slip-resistant teak combines beauty with practicality. Teak has the natural ability to ward off fungi, mold and mildew. MTI Baths uses only 100% legal, FEQ (First European Quality) sustainable teak lumber. For select DoloMatte and Acrylic CXL bases. Custom sizes are available.

SCULPTURESTONE® SHOWER BENCH

Versatile bench in engineered solid surface stone can be used inside or outside the shower. Available in a variety of lengths with either waterfall or parsons style legs; smooth, textured or teak inlay top; white or biscuit in a soft matte or hand-polished deep gloss finish.

SCULPTURESTONE® SHOWER SEAT

Cleanly designed shower seat is constructed in solid surface stone. Available in white or biscuit in a soft matte or hand-polished deep gloss finish.
Includes arms for wall-mounting.

RADIANCE®

A thermal therapy innovation provides an extra level of comfort to showering. The factory-installed, fully integrated low-voltage system applies radiant heat technology to the main shower floor area of Designer Collection shower bases. For DoloMatte and Acrylic CXL bases.
